RE-LINING EQUIPMENT

Felt liners are a proven CIPP solution, resin-impregnated and installed by inversion or pull-in to form a seamless structural pipe. Flexible and cost-effective, they are ideal for small- to medium-diameter gravity sewer and drain rehabilitation

POA

Patch repair kits provide a targeted CIPP solution for localised pipe defects. Designed for spot repairs, they seal cracks, joints, and minor damage without full-length relining. Fast to install and cost-effective, patch repair kits are ideal for extending pipe life

MILLING AND CLEANING MACHINES

Chains are a good all-around cleaning option because they are adjustable. This allows you to make minor adjustments to the chain size to compensate for reduced pipe interior for initial cleaning of blocked pipes and then readjust them to their optimal diameter

POA

The Metal Grinder quickly and efficiently grinds away most metal including rebar, steel rods, nails, screws, and lead joints in DN100 (4”) pipes. The centering brushes provide added stability and make it safe to use in PVC, PE, cast iron, concrete and clay pipes
